

ZenInvoice

Bill Mobile-Print Remote

ZenInvoice is a micro application to generate invoices using personal mobile devices. This gives you freedom to generate invoices from anywhere, even while you are on the move.

The invoice copies can be printed at a remote location, like factory or warehouse, from your mobile. Also, your staff at factory can print the newly created invoice to a local printer.

ZenInvoice is subscription based, hence less investment.

Features

- Generate Invoices on the fly using personal devices (Mobile/Tab/Laptop)
- Print at a remote location like your factory or warehouse from your mobile
- Generate GST Report (Sales)
- Multiple delivery locations for one customer
- Micro application - focused feature list to keep the application tiny
